INDEX

Auerbach, C., *see* Donald, H. P.

Bondi, A., the ensilage of citrus fruit pulp, 89–92.
— the digestibility of citrus feeds, 93–5.
Braude, R., cacao by-products in pig-feeding: cocoa-cake meal and de-theobrominized cocoa-cake meal as feeding-stuffs for pigs, 182–8.
Butter, improvement of Australian, exported to the U.K., 213–18; Australian dairy industry, recent history of, 213–14; grading and packing, 215; factories and equipment, 215–16; fat-content and acidity of cream, 217; improvement of cream, 215–17; inspection, 217.

Cabot, D. A. E., foot-and-mouth disease and its control in Great Britain, 203–6.
Childs, E. C., the mechanics of mole-draining, 169–81.
Cinchona, researches on, in West Java, 28–9; agricultural, 29; botanical, 28; chemical, 28–9; plant-pathological, 29; selection, 28.
Citrus feeds, digestibility of, 93–5; orange culls, 93, 94; orange-pulp silage, 93–5.
Citrus fruit pulp, ensilage of, 89–92; in barrels, 89–90, 91; in cement towers, 90, 91.
Coffee, wild *Arabica* on the Boma Plateau, Anglo-Egyptian Sudan, 207–12; Barbuk area, 207–8; Rume area, 208–10; soils, 210–11; origin, 211–12.
Coster, Ch., the work of the West-Java Research Institute, Buitenzorg, 1938–41, 22–30.

Diseases and pests:
— foot-and-mouth disease, 203–6.
— jassid, on cotton, 133–45.
— of cinchona, 29.
— of *Hevea*, 28, 68–72.
— of jute, 98, 99.
— 'pining' in sheep, 57–60.
— rinderpest, 189–202.
— stem rust of wheat, 245–52.
Donald, H. P., the duration and extent of pedigree breeding in herds of Large White pigs as a factor in breed improvement, 232–44.
Dunlop, G., the effect of season on the fattening of swine at various stages of growth, 161–8.

Edwards, D. C., grass-burning, 219–31.
Elephant grass, use of, for maintaining soil fertility, 126 sqq.

Foot, A. S., *see* Braude, R.
Foot-and-mouth disease in Great Britain, 203–6.

French, M. H., development of live stock in Tanganyika Territory. Pt. V, skeletal development of Masai and grade black-headed Persian sheep, 146–60.

Gaddum, E. W., some observations on jassid at the Kenya coast, 133–45.
Grass-burning, in Kenya, 219–31; discussion, 226–31; experimental, 219–22; results, 222–4; soils, 224–6; vegetation on experimental area before burning, 220–1, after burning, 222–3.

Haines, W. B., a method for foliage comparisons in field experiments with *Hevea*, 117–24.

Jassid, some observations on, at the Kenya coast, 133–45; jassid population, density of, 132–5; differences between varieties, 135–6; effect of wind-protection, 137–40; losses caused by jassid, 140–4.
Jute, production of, in Bengal, 99–102; in India, 96–8; possibilities elsewhere, 102; yields, marketing, costs, 100–1.

Kerr, A. J., a new system of grass-fallow strip-cropping for the maintenance of soil fertility, 125–32.

Live stock in Tanganyika Territory, development of, 146–60.
Lowe, H. J., rinderpest in Tanganyika Territory, 189–202.

Marketing, agricultural, in the Colonial Empire, 1–22; discussion, 18–21; East Africa, 5–7; Eastern Dependencies, 7–10; Mediterranean Dependencies, 12–14; summary, 14–18; West Africa, 2–5; West Indies, 10–12; Western Pacific and Atlantic, 14.
McIntosh, A. E. S., recent developments in sugar-cane breeding in Barbados, 31–42.
Meyer, H., *see* Bondi, A.
Mitchell, R. L., *see* Stewart, James.
Mole-draining, mechanics of, 169–81; the mole-plough: forces on, 170; conditions of equilibrium of, 170–2; magnitude of forces and moments involved, 173–5; setting of, 175–8; strength of, 178–9.

Neatby, K. W., new varieties of spring wheat resistant to stem-rust in the Canadian West, and their genetical background, 245–52.

O'Brien, T. E. H., rubber investigations in Ceylon, 61–76.

Page, Dennis, rabbit-feeding in war-time, 103–16.
Pigs, effect of season on the fattening of, at various stages of growth, 161–8; group

feeding, 165–6; individual controlled feeding, 161–5.

Pigs, Large White, duration and extent of pedigree breeding, 232–44; age-distribution of existing herds, 239–41; classification of herds, 234–6; discussion, 242–3; distribution of herds by duration of life, 236–8; duration and number of herd-book entries, 238–9; rise and decline of individual herds, 241–2.

Pig-feeding, use of cacao by-products for, 182–8; cocoa-cake meal and de-theobrominized cocoa-cake meal, 182 sqq.; feeding-stuffs for pigs, chemical composition of, 182; results, 184–7.

'Pining' in sheep, control of, with cobalt-rich fertilizers, 57–60.

Plant-breeding:
— cinchona in Java, 28.
— *Hevea* (rubber) in Ceylon, 62–5; in Java, 25–6.
— stem-rust resistant wheats in Canada, 245–52.
— sugar-cane in Barbados, 31–42; in the Bombay-Deccan, 48–9.
— tea in Java, 23–5.

Rabbit-feeding in war-time, 103–16; concentrated food rations, reduction of, 103–11; food-consumption of oat-fed and potato-fed rabbits, 115; potatoes as concentrated food, 111–16.

Rege, R. D., sugar-cane research in the Bombay-Deccan, 43–56.

Rinderpest in Tanganyika Territory, 189–202; anti-rinderpest serum, 193, goat-virus, 194, vaccine, 193–4; bovines in Tanganyika, 194; campaign of 1938, 195–8, of 1940, 198–9; map of infested areas, 191; outbreak in 1941, 200–1; position at end of 1941, 201–2.

Rubber, a method of comparing foliage in field experiments with *Hevea*, 117–24.
— investigations in Ceylon, 61–76; early history, 61–2; botanical, 62–8; chemical, 75; mycological, 68–72; soils, 72–5.
— researches in West Java, 25–8; agricultural, 27; botanical, 25; chemical, 26; plant-pathological, 28; preparation, 26–7; selection, 26.

Sheep, 'pining' in, 57–60.
— skeletal development of Masai and grade black-headed Persian, 146–60.

Soil, analysis of, from grass-burnt plots in Kenya, 224–6.
— fertility of, new system for conserving, 125–32.

Soils, manurial requirements:
Arabica coffee on Boma Plateau, A.-E. Sudan, 210–11.
Cinchona, *Hevea*, tea in Java, 22–9.
Cobalt-deficient pasture in Scotland, 57–60.
Hevea in Ceylon, 72–5.
Jute in Bengal, 98.
Sugar-cane in Bombay-Deccan, 54–6.
— of the Murray River irrigation settlements, 79.
— sugar-cane, in Bombay-Deccan, 44–8; alkali soils, 46–8; classification of, 44–5; fertility of, 45–6.

Stewart, A. B., *see* Stewart, James.

Stewart, James, pining in sheep. Pt. II, confirmatory experiments on its control by cobalt-rich fertilizers, 57–60.

Sugar-cane, breeding of, in Barbados, 31–42; problems, 31–2; policy, 32, 42; researches, 32–7; results, 37–42.
— research in the Bombay-Deccan, 43–56; bio-climatic, 56; germination, 49–51; manurial, 54–6; soils, 44–8; varietal, 48–9; water-requirement, 51–4.

Sultana vines, manurial trials with, in Murray Valley, Australia, 77–88; cultural methods, 78–9; effects of nitrogen, 85–6, phosphates, 86, potash, 86, pruning, 86–7; experimental procedure, 79–85; results, 85–7.

Swine, *see* pigs.

Tea, researches on, in West Java, 22–30; agricultural, 24–5; botanical, 22–3; chemical, 24; plant-pathological, 25; preparation, 44; selection, 23–4.

Tempany, H. A., agricultural marketing in the Colonial Empire, 1–21.

Thomas, A. S., the production of jute in Bengal, 96–102.
— the wild *Arabica* coffee on the Boma Plateau, Anglo-Egyptian Sudan, 207–12.

Walters, D. V., manurial trials with irrigated sultana vines in the Murray Valley, Australia, 77–88.

West, Alun, *see* Dunlop, G.

West-Java research institute, Buitenzorg, work of the, 1938–41, 22–30; cinchona 28–9; rubber, 25–8, tea, 22–5.

Wheat, new varieties of spring, resistant to stem rust in W. Canada, and their genetical background, 245–52; distribution of varieties in prairie provinces, 250–1; genetical studies of resistance, 245–7; results of comparative field tests, 248–9.

Wigan, F., improvement in quality of Australian butter exported to the United Kingdom, 213–18.
